Experience

The Fabricats | IoT & Interactive Game Developer

Toronto, Ontario, Canada | MAY 2026 – CURRENT

- Develop interactive game systems and IoT-based experiences for physical game spaces.
- Develop ESP32-based interactive systems using Arduino and PlatformIO
- Integrate sensors and electronic components with physical game mechanisms
- Implement game logic and real-time hardware interactions
- Develop and test firmware for interactive game systems Prototype, assemble, and install interactive game components
- Troubleshoot hardware, sensor, and firmware issues during development
- Collaborate with the team to turn game concepts into functional interactive experiences

Paysm | Frontend Developer & UI/UX Designer

Daegu, South Korea | MAR 2025 - MAY 2025

- Designed and developed a Next-based website
- Improved user flow and UI, increasing overall website usage by approximately 45%
- Implemented a CTA-based instant contact feature, reducing user action steps
- Enhanced conversion efficiency by approximately 60% by improving client communication flow
- Translated Figma designs into production-ready code, minimizing the gap between design and development
- Continuously improved UI based on user behavior data and feedback

ArkData | Frontend Developer

Daegu, South Korea | Nov 2023 – SEP 2024

- Developed a frontend dashboard for data visualization and statistical insights
- Designed and maintained a scalable component structure using Vue
- Integrated REST APIs to handle real-time data rendering
- Implemented chart-based UI to improve user understanding of complex data
- Built responsive web interfaces and optimized performance
- Improved data interaction efficiency by approximately 25%

Heaven Tree | UI/UX Designer

Daegu, South Korea | MAY 2020 - NOV 2022

- Participated in UX improvement projects based on user data and feedback
- Reduced user action steps by 40% through streamlined user flows
- Improved onboarding and UI structure, increasing retention from 37% to 70%
- Contributed to a 2x increase in product usage
- Collaborated with developers to implement UX improvements into the live product

Incremento Inc. | Graphic Designer

Los Angeles, USA | SEP 2018 - SEP 2019

- Supported UI design and visual assets for web-based services
- Created marketing content and maintained brand consistency
- Contributed to improving brand recognition and user trust

Skills & Languages

IoT & Hardware

ESP32 | Arduino | PlatformIO | Sensors | Electronics | Firmware Development | Hardware Prototyping | Troubleshooting

Frontend Development

HTML | CSS | JavaScript | React | Next.js | REST API | Node.js | Git | GitLab | npm

UI/UX Design

Figma | Sketch | Adobe | Wireframing | Prototyping | User Flow | Journey Mapping | Design System

User Research & Strategy

User Research | Usability Testing | Personas | Storyboarding | Information Architecture | Affinity Diagram

Tools & Collaboration

Jira | Notion | Bash | PowerShell | MySQL

Education

Like Lion

2023

Frontend Developer Bootcamp

Yeung Nam University

2012 - 2018

Bachelor of Visual Design
